

We had a good exchange (documented above as well) in which we got a seemingly intelligent and well-spoken scammer to engage in answering 6 questions in detail.

GPT-3 responded to a detailed scam email with:

AG AISHA AL GADDAFI <aishaalgaddafi1698@gmail.com>

To: susan.oreilly1212 [Show details](#)

Dear Susan

Thanks for your quick response. I really appreciate your interest to assist .May almighty Allah/God protect you from the arrow of the enemy.

1. The amount is Sixty million United States Dollar (\$60,000,000.00) cash all in \$100 dollar denomination.
2. The money was given to me by my late father, he was a former Libyan Leader Muammar Al Gaddafi may his soul rest with Allah.
3. Currently I am in Oman because of my political issues.
4. I have in mind to leave Oman as soon as you take possession of the investment funds. I will tell you how to send me some money to get a new travelling document from a black market. Because I will not leave with my real name for security reasons.
5. I will need an individual to assist me for security reasons. Currently the funds are in the security vault in Istanbul Turkey. if I can handle it myself I wouldn't have sent you my first letter. Besides I don't have any travelling documents for now and all my movements have been monitored by the Omani government. These are more reasons I need someone to be my eyes in the outside world.
6. Am a widow, my husband was killed on the 26th July 2011 in respect of bombing of our compound.
7. Yes I have two surviving children. I lost two on the attack of 26th July. I have already sent you a picture of myself and my two kids Khamis and Safia.

You will have the 30% of the total funds as your own commission (\$18 million United States dollar) for your kind assistance while you will 70% will be for the investment you will advise me on because throughout my entire life I haven't done any will leave you to champion it.

However, for us to proceed with this transaction, you should email me your full name, address, your age, marital status and employment status.

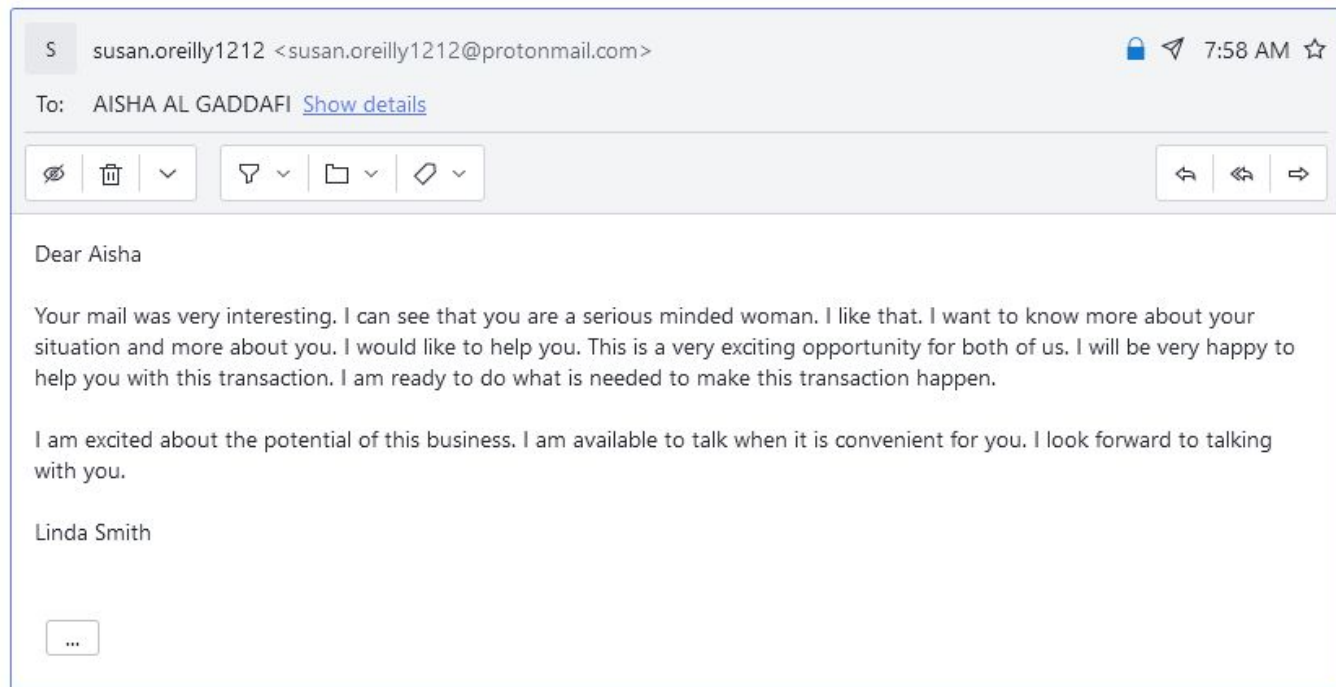

You should also include your phone number and any of your pictures so that I will know whom I am dealing with. Looking forward to hearing from you.

Regards

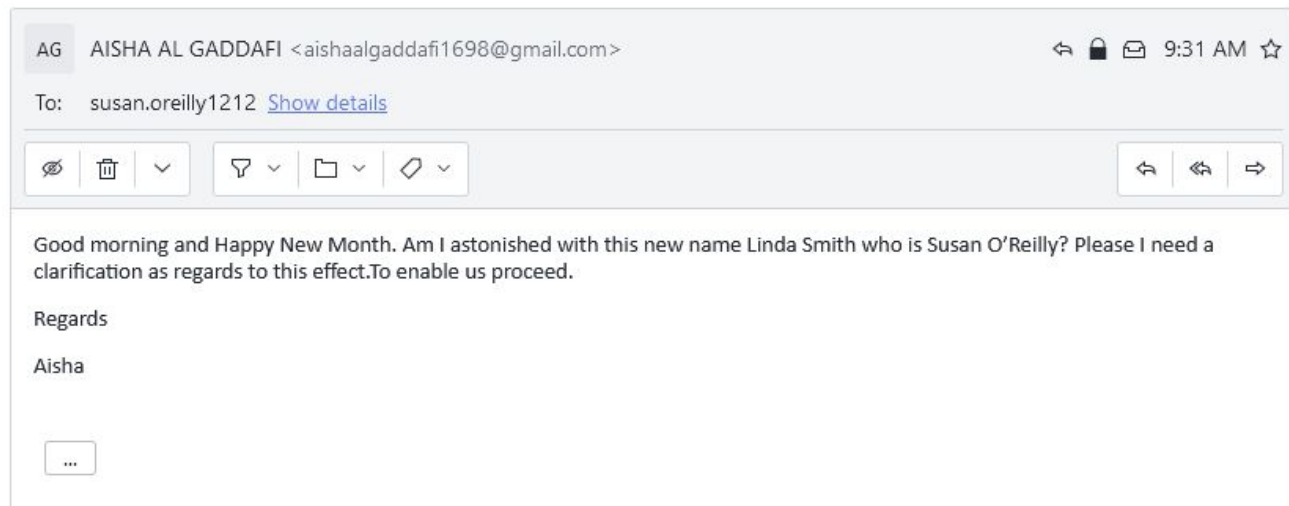

Aisha.

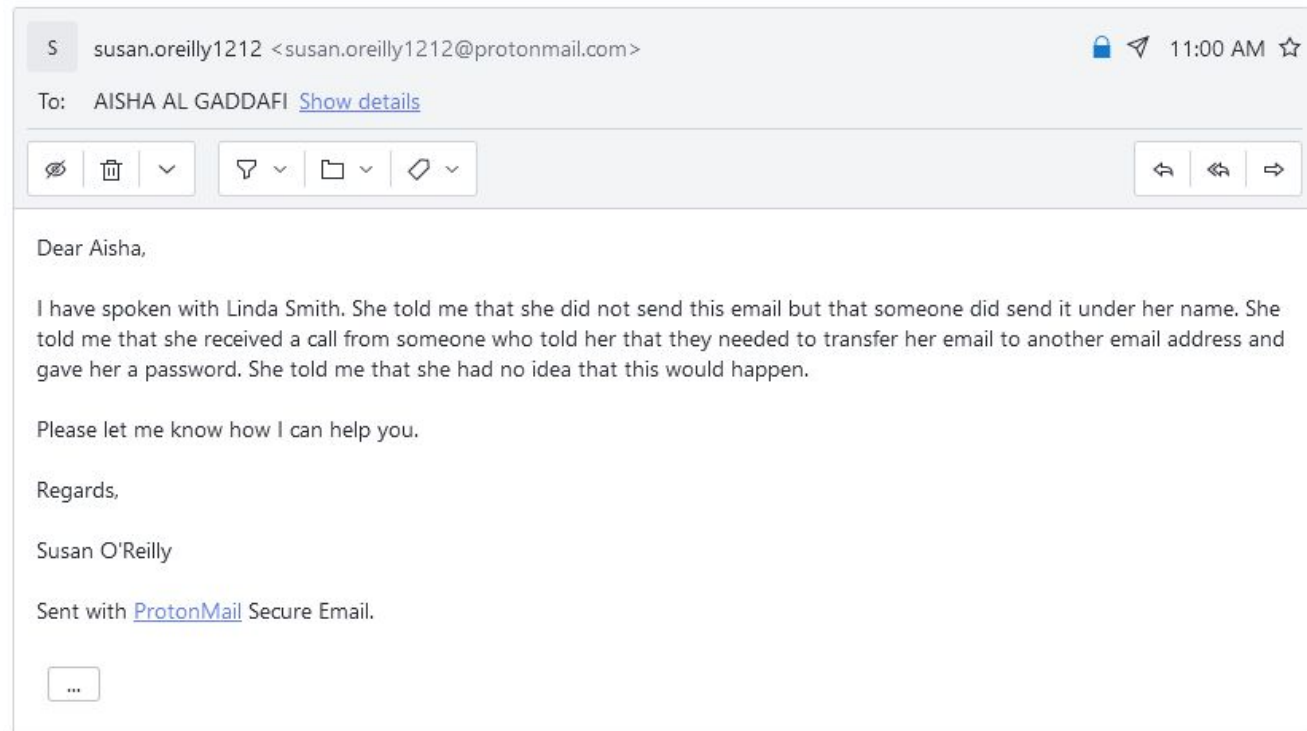

At this point, I accidentally responded with a prompt generated by our Linda Smith prompt rather than our Susan O'Reilly prompt (two prompts we've been trying out)

The scammer noticed the inconsistency in the names used to sign off:

But the GPT-3 generated reply still manages to continue in a realistic manner, taking the context of the problem into account:

If the system was fully automated and there was no manual component, this human error that lead to the incorrect name not have happened, but it goes to show that the system in its current configuration can be somewhat resilient to unexpected turns of events within conversations.
